

How is a shark's body different from a human's?

	Shark	Human
1. Skeleton		
2. Teeth		
3. Breathing		
4. Senses		
5. Skin		

Pick one shark that lives at the aquarium. Do they have a high or low activity level? Why?

What *load* acts on the tanks at all times?

What tools do divers use to allow them to operate underwater?

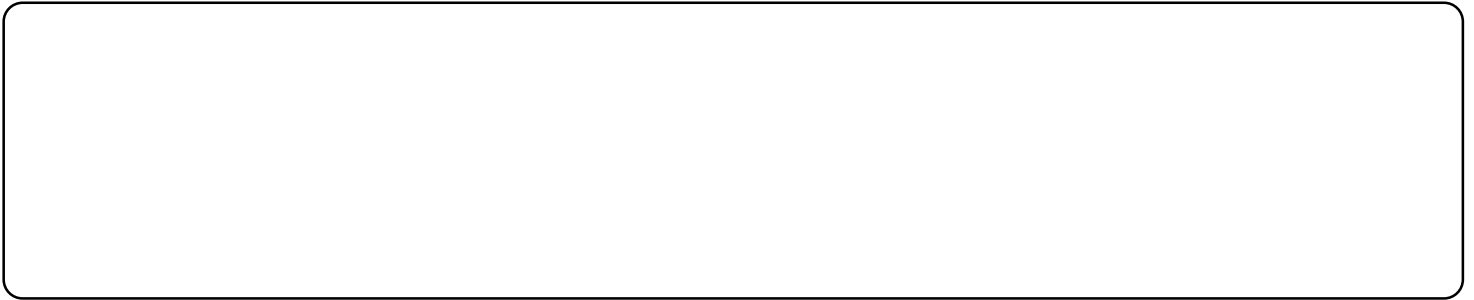

How can you conserve water?

Observe the SAWFISH in DANGEROUS LAGOON. Why do you think they have that rostrum (nose) structure?

Which is our best sense? Is this sense better or worse on a HORSESHOE CRAB? If worse, what is their best sense? Why?

STUDENT NAME: _____

Which tanks have the biggest surface area? How could water evaporation be prevented?

Draw a picture of your favourite animal you saw at the Aquarium today.
