

Label interaction POSITIVE (+), NEGATIVE (-) or NEUTRAL (0) for each animal.

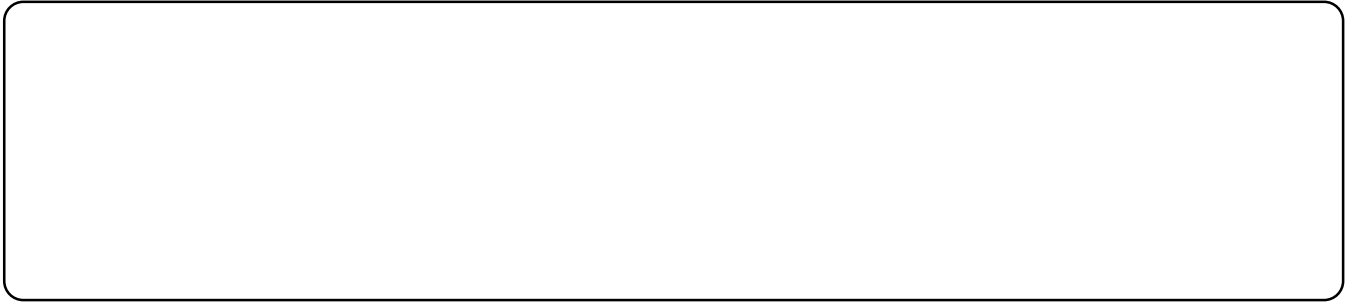

How many shark species did you see today?

What *variables* in the exhibits might animals be sensitive to?

Find and name two endangered species. What happens to an ecosystem when extinctions occur?

Which exhibit has the highest *biodiversity*? Why does having a lot of *biodiversity* make a *habitat* more stable?

Name an animal that can detect electricity. How can they do this and why?

What do humans do that negatively affects *biodiversity*? What can you do to help?

Draw a picture of your favourite ecosystem you saw at the Aquarium today.
